

Cloud-based camera management system
KDDI IoT Cloud Standard
LIVE Course

EASILY RECORD AND STORE REAL-TIME VIDEO
FROM YOUR MONITORED SITES

Easy and convenient recording to the cloud

Recorded videos are stored for 30 to 90 days on a cloud server and can be checked at any time from an online management console. No need for recording equipment on-site!

Simple, hassle-free setup

Simply set up your cameras, log in to the online management console from a PC or smartphone, and the service is ready to use!

International contracts and technical support

KDDI provides global support both pre- and post-installation. You have the option to sign individual affiliate contracts or consolidate them as one international contract, as best fits your budget and business needs.

Check your global business sites in real-time
