

Sensor visualization, data gathering and alert notifications, all included

# KDDI IoT Cloud Standard LOGGER Course

## IMPROVE YOUR BUSINESS EFFICIENCY, CUT COSTS AND INCREASE PROFITS!

### Supports several sensor types

We support a wide variety of sensors, from temperature and vibration sensors, to sensors for flow, electric current, surface level, and more.

### Functionality and flexible customization

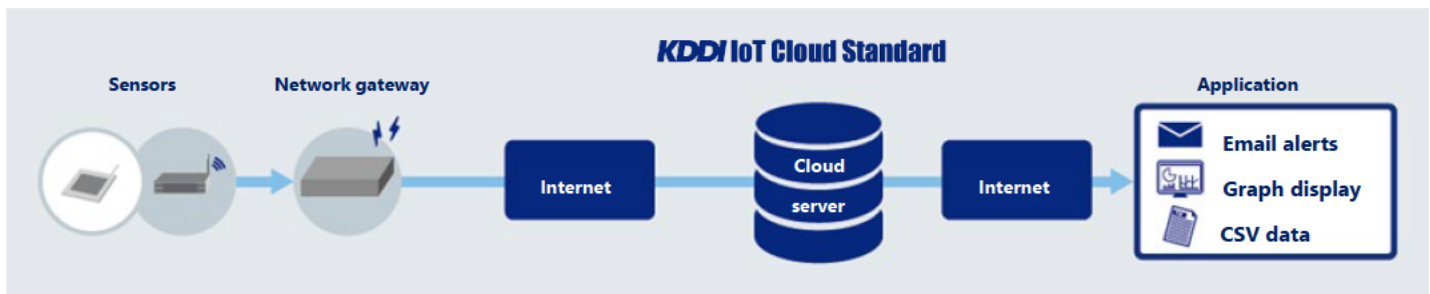

Formatted daily and monthly reports, alert notifications, and screen layout customized by request.

### Provides all of your ICT needs

We can supply sensors and network equipment for the LOGGER course, as well as LAN/WAN infrastructure for the offices and factories to be monitored.

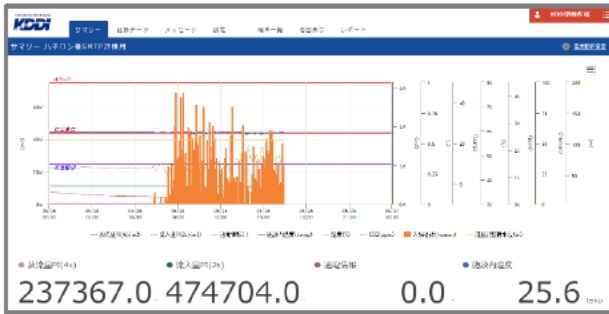

## System configuration

**Sensors, cloud service and data display, all provided!**

**The connection is via Internet, so you can access your sensors from any provider, even from overseas!**
